Profile

Frontend Software Engineer with an education background, focused on building clean, accessible, and responsive UI. Experienced with modern JavaScript and component-based development, and strong at translating requirements into intuitive user experiences.

Work Experience

01/2026 – 02/2026

Frontend Engineer Sinstric AI

- Built a multi-step AI skin analysis web app using **Next.js (App Router)** and **TypeScript**, implementing a complete flow from image capture to analysis and demographic confirmation.
- Integrated an AI image analysis API and designed a **state-driven UI** to visualize confidence scores and predictions in real time.
- Implemented **sessionStorage-based guards** to enforce correct navigation flow (camera → analysis → demographics), preventing invalid route access.
- Developed a **pixel-accurate UI from Figma**, recreating complex diamond layouts, interactive states, and responsive behavior using modern CSS.

Projects

11/2025 – PRESENT

Frontend Engineer Grocery Optimizer

Built a smart grocery comparison tool that helps users minimize total cost across multiple stores.

- Engineered a price-optimization engine that evaluates grocery lists across multiple retailers, generating both single-store and multi-store purchase strategies
- Implemented dynamic per-store shopping lists with subtotals and combined savings comparisons, enabling users to decide when splitting trips is actually cost-effective
- Built a responsive, type-safe Next.js interface with Tailwind CSS, supporting flexible item matching, substitutions, and real-time result updates

Education

08/2013 – 05/2017 CHICAGO, UNITED STATES

Communication Studies | Bachelors Loyola University of Chicago

01/2019 – 05/2022 WASHINGTON, UNITED STATES

Education | Masters American University
